Experiment No 5

Use Google and WHOIS for Reconnaissance

Aim

To gather publicly available information about a website using Google Search and the WHOIS lookup service.

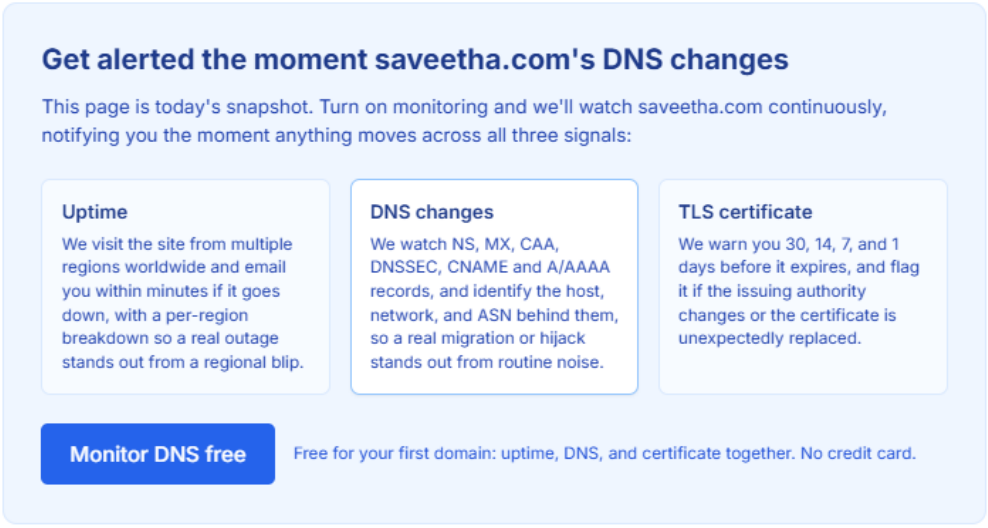

Algorithm

1. Start the Windows operating system and open Google Chrome.
2. Search for the WHOIS website or visit who.is.
3. Enter the domain name saveetha.com in the search box.
4. Click the search button to retrieve the domain information.
5. Observe the available details, such as domain registration date, registrar, expiration date, and name servers.
6. Use Google Search to find additional publicly available information about the website.
7. Record and analyze the collected information.

Output

DNS Records for saveetha.com

Hostname	Type	TTL	Priority	Content
